

# How to Read Your State of Michigan Immunization Record

Your immunization record provides a history of all the vaccines reported to the Michigan Care Improvement Registry (MCIR). The MCIR is an immunization database that documents immunizations given to Michiganders throughout their lifespan. If you were born before December 31, 1993, your childhood vaccines may not be entered in our system. If you have medical documentation of your childhood immunizations work with your healthcare provider to update your immunization record in the MCIR. Connect with your health care provider if you have any questions or concerns regarding your immunization record information.
