

GTB NEWS

The Grand Traverse Band of Ottawa and Chippewa Indians Communications program strives to provide the GTB membership with information about Department Operations, Membership Services, and overall Tribal Government relationships with Local, State, and the Federal Governing bodies. We highlight individuals within the tribal community such as athletes, veterans, graduates, traditional teachers, elders etc. to drive future generations toward success and prosperity.

Department activities include creating and distributing a monthly news publication, development and oversight of the tribal government website, audio/video recording and quick print services. The website address is www.gtbindians.org. The website gives access to all general government services and it includes a "Members Only" portion offering a video playback archive of Gov. committees and Tribal Council approved regular and special session meetings. We offer Audio / Video recording services to archive events and achievements of the membership and the tribal government. We are also continuing to grow our Facebook and YouTube social media pages.

The GTB Newsletter is a monthly publication used to highlight the output of Government services, and scheduled community activities by reporting on the events and services of the Grand Traverse Band Tribal Government.
