

Immediate Ban on Deer Baiting, Feeding, and Attractants (2023)

Due to the spread of chronic wasting disease (CWD) into the 1836 treaty ceded territory, the Grand Traverse Band of Ottawa and Chippewa Indians Tribal Council, upon the recommendation of the Natural Resources and Environmental Committee and the Natural Resources Department, has issued an immediate ban on the use of baiting, feeding, or other chemical attractants for deer. Information on CWD can be found at www.michigan.gov/emergingdiseases. Questions or concerns should be directed to the Natural Resources Department in person, or by telephone at 231-534-7500.
